RLF GATHERS 2,000 POUNDS OF CITRUS FOR THOSE IN NEED

Winter Park, Fla. – Volunteers from RLF – an architecture, engineering and interior design firm – recently participated in the Society of St. Andrew’s Gleaning Network.

The RLF volunteers – who were joined by 18 Winter Park High School students – gleaned 2,000 pounds of citrus, which would have otherwise gone to waste. All of the oranges were distributed by the Society of St. Andrew to local food kitchens and the Second Harvest Food Bank of Central Florida.

Each year, 40,000 volunteers glean with the Society of St. Andrew and pick more than 15 million pounds of fresh, nutritious food for the less fortunate in our community. To participate in the Society’s Gleaning Network, call 800-333-4597 or visit www.endhunger.org.

Founded in 1935, RLF is an architectural, engineering and interior design firm located in Winter Park, Fla. With a staff of over 90 design professionals, RLF provides client-focused services on major projects in the healthcare, religious, education and government markets.
